

Orbitfiles.com combines superb technology with a set of features that can help businesses grow and demanding individuals do a lot more with their files online. Our philosophy is based on a very easy to use interface that can fix very complicated problems. How can businesses collaborate efficiently and safely? How can individuals take full control of their files online?

Unlimited Storage

Olympus Pro and Zeus Pro users get unlimited storage space to save all their important files, never worry again if there is enough space! Businesses can store any short of files, movies, photos, documents or any other type of file for as long as they want.

Automated PC Backup

As an Olympus Pro and Zeus Pro Member you are able to backup all your PC files on our servers. With Hercules Backup you can automate your daily PC backups while you sleep or work. You set up which files you want Hercules to backup and it will do the rest. You can

practically backup your entire PC and have your files available at any time. With Hercules Backup you will able to see entire backup history so even if you delete something by mistake, there is still a change to retrieve it. Businesses owners need their data to be on safe and experienced hands. You can

download Hercules Backup at www.orbitfiles.com/hercules

Hercules Uploader

Hercules Uploader is a very powerfull windows desktop applications available to Zeus and Olympus users. You can upload large files without having to access orbitfiles.com website, share and autobackup your pc files. With Hercules Uploader users can drag and drop files or entire folders to their account, organize their files and save time when it comes to mass file uploading.

Backup File History Retrieval

With Hercules Backup users can retrieve history of backed up files since the first time the file was saved. If you have mistakenly deleted some files you can go back to Hercules and retrieve the deleted files.

File Sharing

Sharing files is very easy with Orbitfiles.com. Businesses do not need to send large attachment to their customers and colleagues, they can just share a file by sending them a link

to download it. File access can also be protected by requiring a password to download the file.

Public Pages

Olympus Pro users can create a public page with all their files or they can select which files to make public. Having your own page will allow your business partners to see your work, leave comments on it and increase completion of business deals. Manufacturers use public pages to post their product photos so that they do not have to email them to their customers. A art painter may also want to present her work to the public by posting all her creations on her public page. She can receive comments and ratings by her customers with a click of a button.

Sub Accounts

Businesses need a safe and technologically advanced platform to increase collaboration among its members. Olympus Pro users can allow others to upload files onto their account safely and fast. A large retailer in San Francisco is using Sub Accounts to allow its suppliers to upload on its account their latest designs on clothing and accessories. By doing that the retailer is speeding up decision making process as well as creates a very well organized database of clothings and accessories design models.

File Encryption

Upload and share all your files with maximum security. Orbitfiles.com uses advanced security technology to allow safe and easy file uploading. In order to upload files using our secure server make sure you login via <https://www.orbitfiles.com>

Remote File Access

Access your files securely from any location or device. You can have full access of your account as long as you are connected online. You can practically have your entire PC files uploaded and backed up on Orbitfiles.com and access it at any given time.

Large Files

You can upload and share large files without having to send them over via email or CD. Olympus Pro members can upload files up to 1000MB!

Price
